ABOUT ME

I am a young software developer with a clear and positive approach to problem solving and passion about programming. I am eager to challenge myself in order to grow and improve my communication and professional skills. I love creating performance driven, optimized and responsive software! Working under pressure has become something common to me since I went to university.

WORK EXPERIENCE

2017 - 2018

Mentor / Assistant Programming Basics
I was mentoring small group of people through the Programming Basics course in SoftUni.

2019

Supervisor in advertising agency
I worked during the summer as supervisor in advertising agency - QWERTY where I developed leadership qualities.

EDUCATION

2019 - Present

Fontys UAS Eindhoven
Although I started practising programming in my school years in 2019 I officially started studying Software Engineering in Eindhoven. Aside from the knowledge I get from the university It gave me life experience. I have learned working in a team in an international environment and how to interact with others in an open and outgoing manner.

**2016 - 2018**

Software University(SoftUni)
Since I started studying in SoftUni I have a passion to become a successful software developer. There I built the fundamentals of my programming knowledge.

2014 - 2019

31 SUCHEM "Ivan Vazov"
Despite the fact the high school in which I graduated is not connected to programming it has a big impact on my general knowledge and my skills. My study in 31 High School was in the area of Management and Economics together with foreign languages.
